Nunavut
Yukon

What Should You Consider When Doing Business In Canada?

You are likely to face a number of issues when starting out as an entrepreneur. This article will provide you with what needs to be considered if you are planning to start a business in Canada. These will assist you in avoiding the pitfalls that affect many entrepreneurs

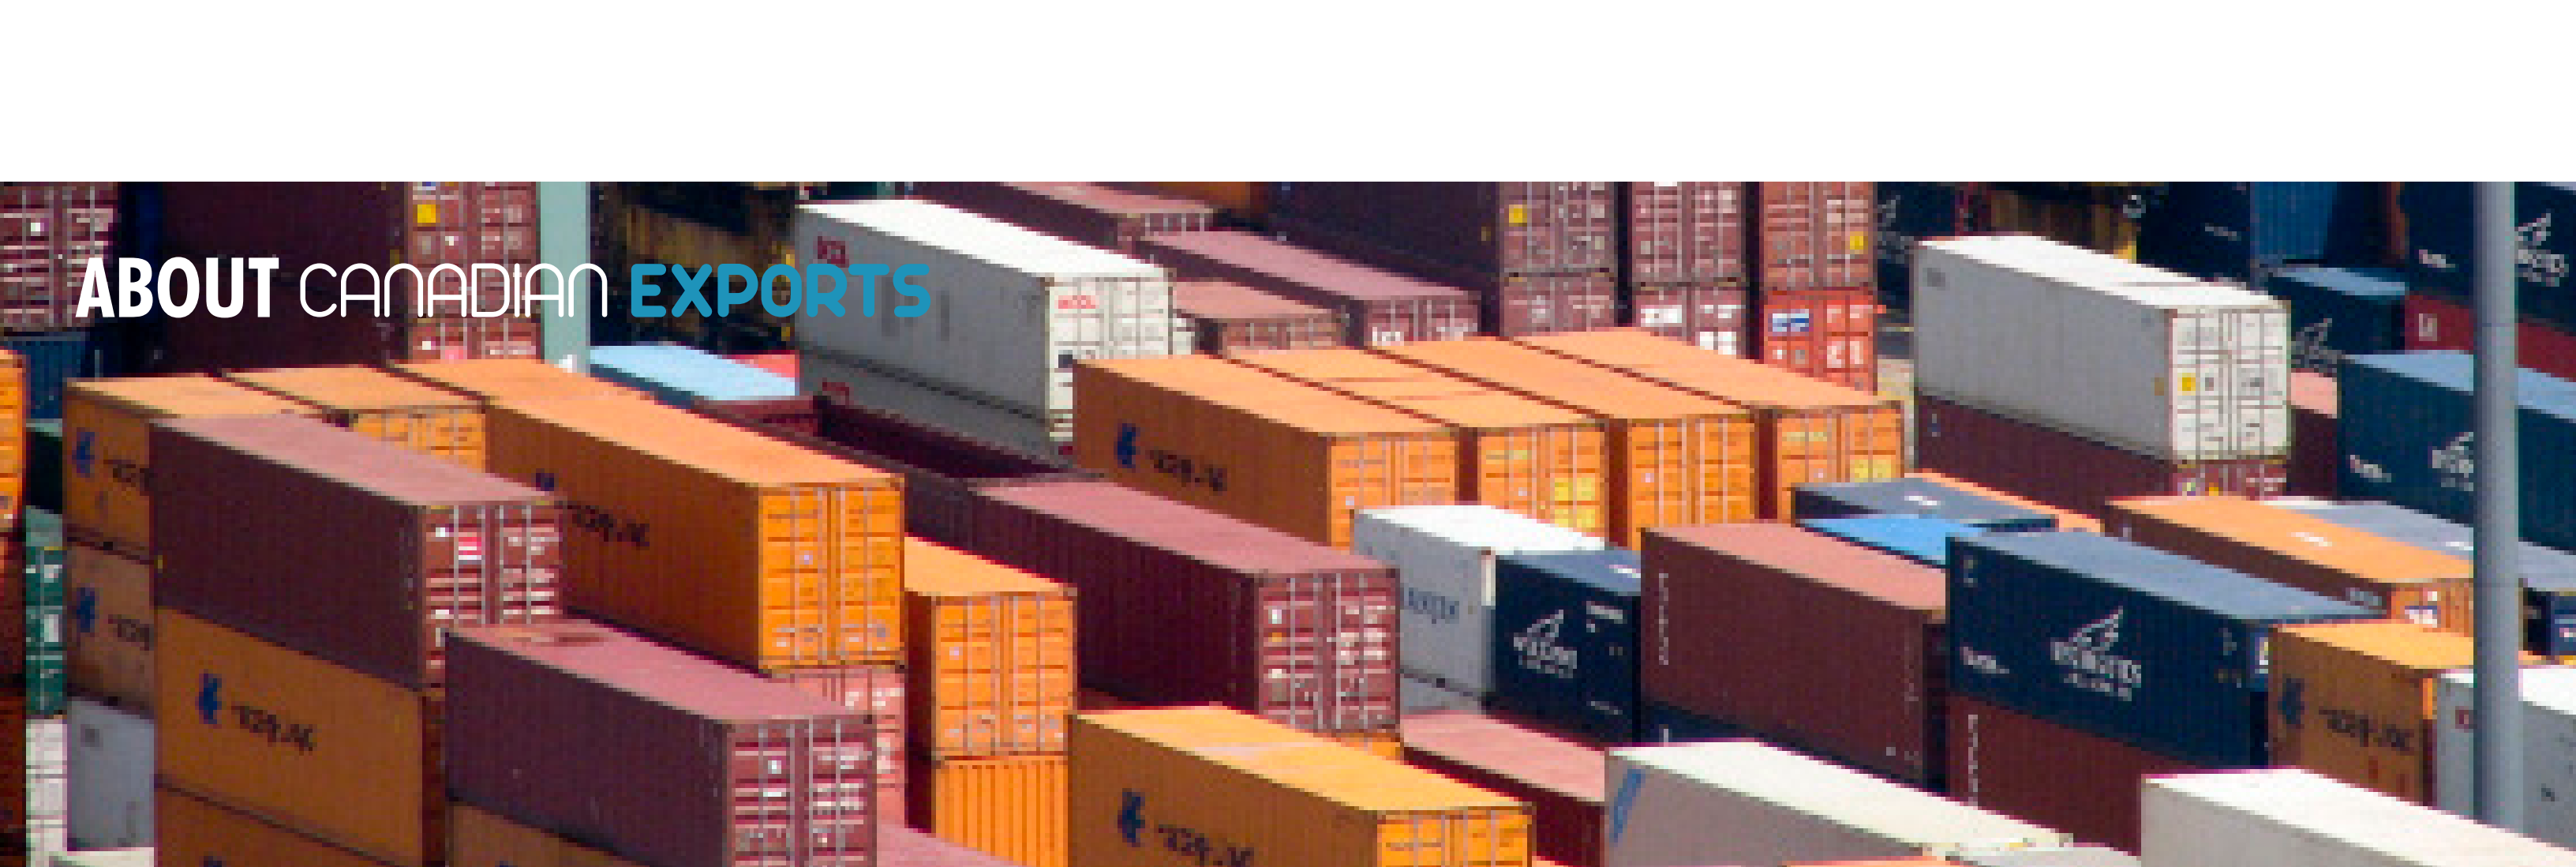

Experience and Education: In order to provide a great service or product, a technical education and experience are needed. Having the right technical education and experience does not necessarily qualify you as someone that can run a business. To run a business successfully, you need to have a knowledge in fields such as sales, marketing, accounting and finance, business law and human resources management. You don't need to be an expert in these fields but an idea in them is enough. This will enable you to hire experts that can handle the needs of these areas

Consider your personality traits: Studies have shown that the most successful entrepreneurs are highly organized, they love their work, and they have a wide range of interests and also analyze risks carefully before tolerating them

Define your market: If you've worked with an industry that specializes in the product you're dealing with, then you should have gotten an idea about who the end users of your products will be and at what price they will be offered. If you don't, then you don't need to start a business

Financing: How will you get the start-up capital? Well, you can get it through your personal savings, family and friends, Canada Small Business Loan program (it provides up to \$500,000 of financing), Canadian youth Business foundation and business development Bank of Canada.

Canadian Exports is located in Quebec.

Exporting Commercial Goods from Canada

This article provides you an overview of the steps or processes you need to undertake when preparing to export commercial goods from Canada. The steps are the factors that should be considered before embarking on exportation business from Canada.

When preparing to export your commercial goods, it is important to obtain a business number. This is issued by the Canada Revenue Agency (CRA). This will enable you to have an import/export account. The import/export account is usually obtained free of charge.

Also, you need to have an appropriate description of goods you intend to export. This will help you to know if your goods are prohibited, regulated or controlled or if you need a license.

More so, you need to decide if you will need to employ the services of customs broker. As an exporter, you are responsible for the completion and presentation of your export documents. You can however hire a licensed customs broker to help you obtain, prepare and present the necessary data, maintain your records and also respond to any CBSA (Canada Border Services Agency) inquiries.

The country of origin of the goods you intend to export should be ascertained as this affects permit requirements.

Furthermore, you must ensure that the goods you're exporting are permitted to be exported from Canada. Drugs controlled under the Controlled Drugs and Substances Act, black bear claws, gall bladder and counterfeit money cannot be exported from Canada.

Moreover, you should ensure that the goods you are exporting are allowed to be imported into the receiving country. The goods granted entry differ from country to country. You must therefore ensure that your goods are allowed in the country you're intending to export them to. This will save you from violating the receiving country's regulations.

AEROSPACE & AVIATION

Apex Precision Inc.

CONTACT INFO:

Wayne Bishop
President

872 de la Cité-des-Jeunes Rte
SAINT-LAZARE, Québec
Canada, J7T 2B5

Tel: +1 (450) 510-5556
Fax: +1 (450) 510-5557

info@apexprecision.ca
www.apexprecision.ca

Apex Precision Inc. has earned a strong reputation for manufacturing complex, high tolerance machined components. Engineers, purchasers and project managers appreciate our consistent quality, competitive pricing, and respect for delivery schedules. We would welcome the opportunity to demonstrate our knowledge, experience and capabilities on your parts requirements. We are the right source if you need R&D prototypes, short production runs, aerospace tolerances and tractability.

SLR Group of Companies

CONTACT INFO:

Linda Cleveland
Sales Manager

Suite 1000, 235 1st Ave,
Kamloops – B.C.
Canada, V2C 3J4

Tel: +1 (250) 374-8577
Fax: +1 (250) 374-8567

info@slrgroup.ca
www.slrgroup.ca

Since inception, SLR Group has grown and diversified to the point where operations span the country and involve several related industries. Through targeted acquisition and expansion the Group has also become involved in building manufacturing and general construction. SLR has successfully pursued developments which have resulted in the Group's ownership of rural water and wastewater utilities, geo-thermal systems and storage facilities. We firmly believe future growth in these types of opportunities is substantial for our companies.

DLL Inc.

CONTACT INFO:

Annie LeBlanc
Vice President

600 Industriel Blvd, Suite E
SAINT-JEAN-SUR-RICHÉLIEU,
Québec Canada, J3B 4S7

Tel: +1 (450) 346-7044
Fax: +1 (450) 346-0643

dll@dllinc.com www.dllinc.com

We have the pleasure to introduce DLL Inc as a North American industrial leader in the manufacturing and repairing of high tech products.

In October 1995, DLL Inc was created by its actual president Laurent Leblanc in Quebec, Canada as a small manufacturing company with only 4 employees. Today the company includes three divisions: Railway, Petroleum and Industrial with more than 40 full time employees.

DLL Inc serves the Railway, the Petroleum and the Industrial market through its activities in the fields of manufacturing new products. DLL Inc also supply rebuild parts as Utex, Outright or on Repair-Return base. The company's expertise lies in the design, development and manufacture of a comprehensive range of electrical and mechanical components, while maintaining good quality, reasonable price level and quick turnarounds.

RoadPacker Group Ltd.

CONTACT INFO:

Michael A. McDermott
CEO, Owner

105-150 Crowfoot Cres NW,
Suite 209 CALGARY,
Alberta Canada, T3G 3T2

Tel: +1 (403) 201-7444
Fax: +1 (403) 770-8375

macd@roadpacker-group.com
www.roadpacker-group.com

Welcome to the website of The RoadPacker Group - one of the world's fastest growing soil stabilization companies. We specialize in environmentally safe, water soluble chemicals for soil stabilization, soil compaction, dust suppression and other soil stabilizing related products.

How we started: In 1990, RoadPacker began initial market research in Australia into the field of chemical soil stabilization. The research identified a market for this type of product, within a road construction and maintenance industry that was spending billions of dollars each year. At local, as well as national levels - many administrations/ governments were spending as much as 50% of their entire budget on roads. Aided by the advances in chemical technology during the last 30 years, ongoing research led to the development of a new chemical soil stabilizer called RoadPacker Plus.

Tel: +1 (506) 327-4355
Fax: +1 (506) 327-3757

info@moderneslate.ca
www.moderneslate.ca

Moderne Slate Roofing Systems by TRACC has involved years of research and study. When the idea of creating a viable recyclable shingle came to light it was known that this shingle had to be significantly better than those on the market. TRACC set about gaining the services of experts in the roofing field and the plastics field, testing and retesting materials to make sure that the product was 100% recyclable. We also wanted to make sure that it would gain the approval of what a roofer would look for in a shingle so we enlisted the help of veteran roofers collaborating and gaining there input.

www.ddi-heatexchangers.com

NEW FEATURE:

Comparing DDI "Cube" or "Square" Heat Recovery to competition.

Since DDI's Heat Recovery System has a Minimum Gap of 2.75" on both sides (to avoid blockage) it makes no difference which side has Water or Sludge, or even both sides could have Sludge (for Heat Recovery).

We achieved our NON-PLUG design (compared to the Spiral design) via large GAPS, NO OBSTACLES and ROUND CURVES.
