

1. Job Search

1) Freelance

(1) [freelancer.com](https://www.freelancer.com) (Australia)

Pitfall 1:

- Don't accept until verified. If you accept: 500\$/ -55\$
- Most of the time we use Milestone creation: 500\$ / 200\$+200\$+100\$

Pitfall 2:

- Don't run any project on localhost in job discussion step.
- Exam: MFC - desktop app-----> virus

(2) [upwork.com](https://www.upwork.com) (US)

How to find: broker-----> by using [telegram](#), [vk](#), [teams](#), [discord](#), [twitter](#),
[Linkedin](#), [Freelancer client...](#)

Type exam: [english + dev](#)

① Verification : require after First job offer

② When paid amount is less than \$500, fee is 10%. When over \$500 paid, \$5

③ Review job

④ Review client

First, you need to check the following:

- Payment verified
- Hire history
- Pay hourly rate

⑤ Bid fast/well

- First two sentences are important
- Write resume, portfolio in detail

※ Pitfall:

Do not download any files---> virus

2) Remote jobs

Steps:

Bid, interview / test, hire, work, payment

- Bid

Resume phone number: <https://hushed.com/>

Resume: do not use photo(usa,canada)

One time phone verification code: <https://felixmerchant.com/>

- Hire

ID verify (ID card, Passport, SSN)

ID Maker (Broker)

SSN(US), SIN(Canada)

- Payment (Bank)

Wise, Payoneer (US Virtual Bank)

Client -> Payoneer -> **Payoneer Broker (currency convert)** -> Crypto

Airtm, Parallax (US Virtual Bank -> Crypto)

Payment Broker (bank)

※Contracts:

- 1099 - i pay tax - \$8000

- W2 - company pays tax - \$8000 -> \$6000

- Full time / Permanent - W2, Vacation, Bonus, Send company PC/VPN, Equity 5%

2. Professional experience

1) English

- Do not use period/fullstop at the end of the sentence in chat

- Study "... interview questions" in google before chatting with client

- Use short forms/abbreviations in chat. Btw, fyi

- Web3, 3dmax, X.com....

2) Another AI Tools:

- Chatgpt - OpenAI

- Gemini - Google

- Grok - X/Twitter

- Claude - For developers

- Deepseek - China

3) Naming Regular

- Github name - Carlos Lennix

- Username - carloslennnixx, lenixcarlos

- Do not use birthday numbers, underscore _, dash -

- Gmail

- Website domain - do not use dash
- Photo
 - Do not use real photo

3.Tech loadmap

1) Frontend:

- **React**, Vue, Angular, Svelte
 - (In React)
 - CSS - **Tailwind CSS**, Styled Components, Chakra UI, Shadcn, Bootstrap
 - API Call - **React-query**, useSWR(<https://swr.vercel.app/>)
 - Global State Management - **Zustand**, Redux(Redux-thunk, Redux-saga)
 - > Redux-toolkit

2)Backend:

- JavaScript/TypeScript - **Nest.js**, Node.js, **Express.js**
- Python - Flask, Django
- Go - Gin

3)Web3 Dapp:

- **Wagmi.sh** + **Ethers.js**, Web3.js,
- Wallet Connect - Rainbowkit, Dynamic.xyz
- Smart contracts:
 - Solidity - EVM, **Hardhat** (Truffle/Ganache), Foundry
 - Rust - Solana, Anchor
- Blockchain:
 - Bitcoin - Proof of Work
 - Ethereum - Proof of Stake
 - Solana - Proof of History
 - Node, Miner / Validator

4) AI:

Machine Learning, Generative AI, Python/R

※ Template URL:

Web3/Solidity

<https://www.useweb3.xyz/>

Solidity:

<https://github.com/PaulRBerg/hardhat-template>

<https://github.com/foundry-rs/foundry>

Frontend:

<https://github.com/theodorusclarence/ts-nextjs-tailwind-starter>

Backend:

<https://github.com/nestjs/typescript-starter>
